Master Degree in Geological Engineering

To create professional who are capable and able to work in the fields of research and education, oil, gas, coal, and mineral industries, construction services, and regional development, as well as volcanology and geothermal.

Doctoral Degree in Geological Engineering

To create skilled professional be able to grow and develop in various geological related disciplines, excellent in morals, uphold scientific and intuitive truths, adhere academic freedom, and able to cooperate with various disciplines.

Accreditation Status

Master and Doctoral Degree under study Program of Geological Engineering has obtained the “A” accreditation level by Badan Akreditasi Nasional Perguruan Tinggi (BAN-PT)

The Curriculum Option For Master Program

- Geosciences
- Geology for Oil and Gas
- Geology for Engineering
- Economic Geology
- Volcanology and Geothermal

Intake Program Choice

- Regular basis (100% study on campus)
- Master by research (75% study off campus)
- Master by collaboration (90% study off campus)
- Doctor by partnership (100% research off campus)

Registration Information

Student admission are held each semester in July and January. More complete information regarding master and doctor program registration and requirements:
